

✓ CORRECT - Predicted=1, Actual=1 | Cost: 280.8650 | Constrained: 172/1639 | Temporal Intervals: 126

The figure displays a comparison between a test sample and ground truth data over 1600 time points. The blue line represents the test sample, which shows a general downward trend from 0.5 to -3.0, followed by a recovery to 0.5. The red vertical bars represent the ground truth, which is mostly between -1 and 2, with a major negative spike around time point 650. The x-axis is labeled 'Feature Index (Time Points)' and the y-axis ranges from -8 to 4.
